Abstract

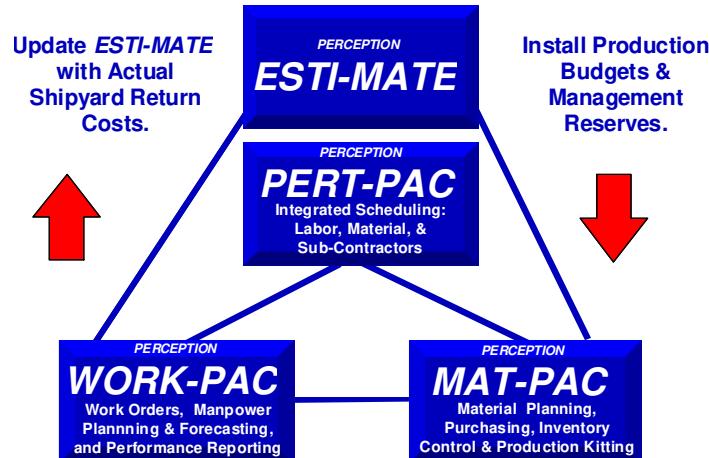

Shipyard planning and material control have three fundamental objectives:

- ❑ Ensure that all required resources (drawings, material, labor, subcontractors and facilities) are all available when the work is scheduled
- ❑ Organize the work to be the most productive possible
- ❑ Monitor progress and measure actual costs and schedules against budgets and plans

This document presents the fundamentals for planning and managing material for new ship construction and major ship conversion contracts¹. The discussion outlines a framework from which the shipyard can develop a logical, well-organized material control plan from the outset of a contract. The computerized material control system requirements and capabilities are based upon SPAR's *PERCEPTION*® system, of which *PERCEPTION MAT-PAC™* provides the majority of the purchasing and material control functions.

Good Material Control Management is always seeking ways to reduce material costs, better support production and eliminate non-value-added efforts. Reducing material handling costs should be a major priority for material control. In addition, obtaining better cooperation from vendors to deliver material that better addresses the needs of production processes can result in significant savings overall.

SPAR Associates, Inc.

The Integrated *PERCEPTION* Planning & Resource Management System

¹ Material control for ship repair projects has similar functions and procedures as for new construction, but usually with fewer opportunities for long range planning and scheduling and detailed engineering requirements.

TABLE OF CONTENTS

<i>Chapter 1: Introduction</i>	1
<i>Chapter 2: Material Control Organization</i>	4
Engineering.....	7
Production Material Requirements.....	7
Quality Assurance Inspection Specifications	8
Primary Transactions by Engineering	8
Purchasing	8
Planning	9
Stores	11
Quality Assurance.....	12
Material Control	12
Material Control Manager.....	12
Accounting.....	14
Project Manager.....	14
Computer Systems.....	14
Material Control Integrated With Planning & Labor Management Systems.....	15
Material Control Systems Interfaces With Financial Systems.....	16
Alternative Purchasing & Inventory Control Software.....	17
Integration of Material Control With CAD Systems	17
Validating System Database.....	19
Electronic Commerce over the Internet.....	19
<i>Chapter 3: Material Types</i>	20
Standard Parts	20
Non-Standard Spec Items	20
Manufactured Parts.....	21
Subcontractor Services, Material & Equipment	21
Stock Inventory.....	23
Vendor Furnished Information	23
Drawings & Technical Information.....	23
Owner Furnished Material.....	23
Spares & Load Items	23
<i>Chapter 4: Material Identification</i>	25
Contract Work Breakdown Structure	25
Ship Work Breakdown Structure (SWBS).....	25
Product Work Breakdown Structure (PWBS).....	26
Drawings & Technical Documents.....	27
Drawing Bills of Material.....	27
Material Requisitions.....	28
Purchase Orders	28
Parts Catalog.....	30
Standard Purchased Parts.....	32
Standard Interim Products	32
Stock Inventory Items.....	32

Non-Standard Purchased Parts & Equipment.....	32
Work Orders	33
Work Order Pallet Pick Lists.....	33
Vendor Furnished Information	34
GFE/CFE/OFE Furnished Material	34
Spares & Load Items	34
Chapter 5: Material Cost Management.....	36
Job Costing	36
Material Cost Budget at Completion (BAC).....	36
Material Cost Estimate at Completion (EAC).....	37
Management Reserves	38
Purchased Material Cost.....	38
Delivered Material Cost.....	38
Paid Material Cost	38
Stock Issued.....	38
Reserved Stock Cost.....	39
Material Used Cost	39
Committed Material Cost	39
Un-Priced Purchase Order Items	39
Material Actual Cost of "Work" Performed (ACWP).....	39
Case 1: ACWP = Total Committed Material Costs	41
Case 2: ACWP = Delivered Costs	41
Case 3: ACWP = Total Paid Invoices	42
Case 4: ACWP = Costs of Material Issued to Production	42
Stock Inventory Pricing	43
Material Budgeted Cost of "Work" Performed (BCWP)	43
Chapter 6: Material Scheduling.....	44
Baseline Planning	44
Shipyard Standards	45
Construction Build Strategy	45
Hull Block Construction.....	45
Erection Sequence	47
Zone Outfit	47
